

AVAILABLE FOR Q2 PROJECTS

Alex Rivera
Full-Stack Engineer & Creative Coder

Architecting ultra-low latency interfaces, distributed reactive systems, and tactile digital experiences at the intersection of mathematical graphics and robust software architecture.

Featured: Reactive WebGL Engine v2.4

sandbox.runtime.ts 60 FPS
WebGL 2.0 / GLSL
DESIGN & ALGORITHMS
GENERATIVE EXPLORATION
Neural Audio Synthesizer
Real-time procedural spectral transformation

99.8% Lighthouse
42ms Latency
140k+ Stars / Clones

SELECTED PORTFOLIO 9 Case Studies

Featured Projects

View All Projects

Next.js 14
Aether OS Telemetry
Real-time edge compute monitor with sub-millisecond telemetry ingestion and server-side streaming...
SSR / React Server

React / Go
Vortex Pipeline Engine
High-concurrency data transformation microservice managing 400k events/sec with reactive frontend...
Goroutines / Canvas

Kubernetes
Helios Cluster Orchestrator
Self-healing multi-cloud cluster manager with predictive node auto-scaling and zero-downtime rollover.
Terraform / Istio

Rust / WASM
Krypton Parser & VM
In-browser memory-safe code execution engine with JIT compilation for algorithmic rendering loops.
WebAssembly / Tokio

TypeScript
Prism Component Core
Headless accessible component architecture powering enterprise financial applications across 40+ engineering
Strict Typing / Radix

Python / D3.js
Synapse Latent Atlas
Interactive 3D t-SNE and UMAP vector space visualizer for interpretability research on large language model...
NumPy / SVG Canvas

FastAPI
Chronos Event Mesh
Asynchronous job scheduler and event broker handling complex recurrent workflow execution with automatic...
Pydantic / Redis

WebAudio API
Resonance DAW Engine
Browser-native multitrack Digital Audio Workstation featuring parametric equalizers and convolution reverb.
DSP / AudioNodes

Solidity / EVM
Equinox Liquidity Vault
Formally verified automated market maker protocol featuring slippage mitigation algorithms and flash loan
Foundry / Hardhat

Core Technologies & Tools

Battle-tested instruments used daily to translate abstract challenges into performant, production software.

HTML5 Semantic Web
Tailwind Utility CSS
TypeScript Type Systems
React SSR & Client
Python Scientific/ML
Django Batteries-In
Git VCS / CI-CD
VS Code Dev Workflow

Protocol Proficiencies: GraphQL, WebSockets, gRPC, OAuth2, OpenTelemetry

Testing Standard: Playwright, Vitest, Cypress, Mutation Testing
